**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Difficult conditions for Wednesday, particularly through the afternoon at height with a severe wind chill, also extensive hill fog and driving snow, with risk of blizzard conditions across highest peaks.

Forecast for Thursday 24 Nov 2022
Weather: Showers occasionally merging to longer periods of snow and below 900m rain, with southern ranges most exposed.

Maximum wind: South to southeast mean 30-35mph with gusts reaching 50-55mph across most exposed ridges and summits.

Chance of cloud-free hill tops above 800m: For any given instant 40% in south, 80% in north, but low for extended clear spells given the showery nature of the flow.

Low Cloud and visibility: Good becoming moderate or poor in rain and showers, very poor in snow and within cloud with bases frequently in south and occasionally in north, lowering 500m.

Temperature: **Glens:** Minus 3 Celsius increasing 9 Celsius during the afternoon
At 800m: Plus 1-2 Celsius
Freezing level: Around 1000m
